– Massive forest damages in Europe	33
– Difficult situation in the pigmeat market.....	33
– State of play of various legislative files in the field of agriculture.....	33
– Follow-up to the fipronil incident: state of play of implementation.....	34

OTHER ITEMS APPROVED

AGRICULTURE

– Regulation amending general food law - General approach.....	35
--	----

- ¹
- Where declarations, conclusions or resolutions have been formally adopted by the Council, this is indicated in the heading for the item concerned and the text is placed between quotation marks.
 - Documents for which references are given in the text are available on the Council's internet site (<http://www.consilium.europa.eu>).
 - Acts adopted with statements for the Council minutes which may be released to the public are indicated by an asterisk; these statements are available on the Council's internet site or may be obtained from the Press Office.

FISHERIES

- 2019-2020 fishing opportunities for certain deep-sea fish stocks - adoption 35
- 2019 fishing opportunities for certain fish stocks in the Black Sea- adoption..... 35

FOREIGN AFFAIRS

- EUBAM Libya 36
- Sanctions in view of the situation in Libya 37
- Gender mainstreaming policies in the fight against small arms misuse 37
- EUCAP Sahel Mali 38
- Countering small arms and light weapons in Latin America and the Caribbean 38
- Operation Atalanta 39

ECONOMIC AND FINANCIAL AFFAIRS

- Luxembourg 2 euro commemorative coin..... 39

TRADE

- Agreements under Article XXI of the General Agreement on Trade and Services (GATS)..... 39

INTERNAL MARKET AND INDUSTRY

- Type approval of two or three-wheel vehicles and quadricycles..... 40
- Classification, labelling and packaging of substances and mixtures 40

TRANSPORT

- Trans-European transport network guidelines - update of annexes 41

ITEMS DEBATED

AGRICULTURE

Post 2020 Common Agricultural Policy (CAP) reform package

In public session the presidency presented to the Council its progress report ([15027/18](#)) on the work carried out in the Council on all the Commission proposals of the CAP reform package:

- a regulation on CAP strategic plans
- a regulation on financing, managing and monitoring of the CAP
- a regulation on a common market organisation of agricultural products

Delegations that took the floor, welcomed the report and the progress made by the presidency during the semester. They also highlighted some of the issue to be further discussed before a Council compromise position can be reached. These include: simplification and the actual functioning of the new delivery model, the performance framework, the "green" architecture, coupled payments, some aspects of market measures and of the wine market.

During the Austrian presidency a first read-through was completed for all the three proposals and technical and substantial amendments were suggested in writing.

Concerning the changes suggested by the presidency on the basis of delegations' positions, the vast majority concern the CAP Strategic Plan Regulation, also in light of the political importance of issues such as the new delivery model and the performance-based approach.

Proposed changes to the draft CMO and Horizontal Regulations are less numerous and mostly meant to improve the current regimes from a technical technical and substantial point of view.

The Commission's proposals for a CAP reform worth €365 billion introduce a new delivery model by which member states will have more flexibility in how to use their funds and will be able to tailor-make their programmes. A single set of 9 EU-wide economic, environmental and social objectives will be identified at EU level and each member state will have to draw up a Strategic Plan covering the whole programming period, setting out how it intends to meet those objectives, using both direct payments and rural development. The Commission will approve each plan to ensure consistency and the protection of the single market, and monitor the progress towards objectives and targets using a set of result indicators agreed at EU level.

The Commission proposals also outline new obligations and incentives for farmers on the front of environment and climate action. Direct payments will be conditional on enhanced environmental and climate requirements and member states will have to offer eco-schemes to support farmers in going beyond the mandatory requirements, funded with a share of their national direct payments' allocations.

Moreover the new CAP will better target small and young farmers thereby facilitating generational renewal, and will try and foster greater use of knowledge and innovation.

This item was discussed jointly with the Any other business item on the interparliamentary conference "The role of Parliaments in shaping the future of food and farming" (read below).

Updated EU Bioeconomy Strategy

In public session the Council exchanged views on the EU Bioeconomy Strategy as recently updated by the Commission, and the role that the agricultural sector can play in it, on the basis of a set of presidency's questions:

- in your opinion, is the bioeconomy fully deploying its potential to create higher value for agricultural and forestry and to boost economic growth and employment, particularly in rural areas?

- in your opinion, are the 14 actions proposed by the updated EU Bioeconomy Strategy appropriate to fully unleash the bioeconomy's potential, particularly from the perspective of a primary producer? Are there further opportunities to be explored, including through interactions with already existing funds?

Bioeconomy comprises those parts of the economy that use renewable biological resources from land and sea to produce value-added products such as food, feed, materials and energy.

In 2012 the Commission published its Bioeconomy Strategy and in 2017 started a review which led to the publication of an updated strategy on 11 October 2018.

All delegations took the floor, welcomed both the updated Strategy and the related Action Plan and gave a positive assessment of the role of agriculture and forestry.

They agreed that bioeconomy can support the achievement of the EU environmental goals through sustainability and circularity, and can help boost economic growth and employment, particularly in rural areas and in relation to the use of natural resources and biomass.

Ministers considered that the potential of EU bioeconomy is not fully exploited yet and that the 14 actions proposed by the Commission in its updated Strategy may help to unleash such potential.

They agreed that not only political guidelines, but also practical support would be necessary to remove any barriers to the use of the bioeconomy, e.g. on the marketing of raw materials.

They underlined that local actions are crucial to better take advantage of the bioeconomy's potential, but that at the same time a systemic approach should be adopted in order to fully exploit the complementarity of different policies and funds, particularly in the research field.

To this extent, adequate EU financing was considered to be essential to the development of bioeconomy.

This item was discussed jointly with the Any other business item on the "BIOEAST Conference: Bioeconomy in the forefront of national policies" (read below).

FISHERIES

2019 fishing opportunities in the Atlantic and North Sea

Next year the number of fish stocks managed at maximum sustainable yield (MSY) levels will rise to 59, and there will be additional protection for the European eel. At the same time EU fishermen in the Atlantic and the North Sea will be able to increase their catches of a number of healthy stocks.

After very intense negotiations, the Council reached agreement on 2019 catch limits for the main commercial fish stocks in the area. The agreement is based on a strong commitment to the objectives of the Common Fisheries Policy (CFP): environmental, economic and social sustainability.

The Council decided in particular to increase catches for a number of stocks, including plaice in Skagerrak/Kattegat, the Southern hake stock, Western and Southern horse mackerel, cod, sole and plaice in the Irish Sea, and sole and megrim in the Bay of Biscay. Decreases were also agreed for some stocks.

The issue of choke species in mixed fisheries, i.e. species with a low quota that can cause a vessel to stop fishing even if it still has quota for other species, was addressed through enhanced inter-area and inter-species flexibility. Moreover a new quota exchange mechanism was created for member states without a quota for by-catches in five fisheries: cod in the Celtic sea and west of Scotland, whiting in the Irish sea and west of Scotland, and plaice in the south-western part of area 7.

The Council decided to further protect European eel by extending the mandatory closures agreed for 2018 to recreational fisheries and glass eel fisheries. These measures will cover brackish waters such as estuaries, coastal lagoons and transitional waters, and will ensure consistency with the measures on eel in the Mediterranean Sea.

Finally concerning northern seabass, commercial fisheries will remain prohibited with some exceptions, taking into account the positive developments reflected in the scientific advice. It was decided that allowed catches would increase to 5.5 tonnes/vessel for hooks and line fishery, to 400kg for two months for trawlers, to 210 kg for seines, and 1.4 tonne per year for fixed gillnets.

For recreational fisheries the "bag limit" stays at 1 fish per day but for 7 months.

This regulation will be adopted through a written procedure, following finalisation by the legal/linguistic experts.

ANY OTHER BUSINESS

- *Outcome of the interparliamentary conference "The role of Parliaments in shaping the future of food and farming", Zagreb 22 23 November 2018*

The Croatian delegation presented the results of the above-mentioned conference that was organised by the Agriculture committee of the Croatian parliament and the Ministry of agriculture of the Republic of Croatia and gathered, among others, representatives of national parliaments of EU member states and of the European Parliament.

The conference was an opportunity to exchange views and make a concrete contribution to the debate on a new legislative framework for the Common Agricultural Policy in the forthcoming programming period.

- *Outcome of the conference "BIOEAST Conference: Bioeconomy in the forefront of national policies", Budapest 8 November 2018*

The Hungarian delegation informed the Council about the outcome of the above-mentioned high-level conference, which was organised jointly by the Ministry of Agriculture and the Hungarian Academy of Sciences as part of the Hungarian Science Festival on 8 November 2018. The conference focused on the situation, challenges and opportunities of bioeconomy of the BIOEAST macro-region.

BIOEAST is the Central-Eastern European Initiative for Knowledge-based Agriculture, Aquaculture and Forestry in the Bioeconomy. It offers a shared strategic research and innovation framework for working towards sustainable bioeconomies in the Central and Eastern European countries.

- ***Regulation amending Regulations (EU) No 1305/2013 and (EU) No 1307/2013 as regards certain rules on direct payments and support for rural development in respect of the years 2019 and 2020***

In public session, the Commission informed the Council about its proposal for a regulation modifying rules on direct payments and rural development to guarantee a smooth transition between the current and the future CAP. The proposal is intended in particular to:

- allow for the continuation of the flexibility between pillars and the transfer of the estimated product of reduction of payments (capping) in the calendar year 2020
- phase out of Area Natural Constraint
- widen technical assistance at the initiative of the Commission in order to prepare the future CAP.

The Commission took the opportunity to emphasise that a timely adoption of this regulation is needed in order not to have any disruption in payments in some member states.

- ***Outcome of the conference "The development of Plant Proteins in the European Union – Opportunities and Challenges", Vienna 22 23 November 2018***

The presidency informed the Council about the outcome of the above-mentioned conference, which was co-hosted by the Austrian Minister for Sustainability and Tourism, Ms Elisabeth Köstinger and the European Commissioner for Agriculture and Rural Development, Mr Phil Hogan.

The conference gathered around 200 experts from the agricultural supply chains for feed and food production, research and advisory networks, and national and regional administrations with the aim of discussing the main findings of the European Commission's report on the development of plant proteins in the EU on current plant protein production in the EU and its potential for further development.

In its intervention the presidency underlined the importance of protein crops for both human nutrition and animal feeding, and informed on how the plant proteins production in Europe would help to increase the EU's self-sufficiency and to contribute to mitigate climate change.

– ***Massive forest damages in Europe***

The presidency drew the attention of the Council to the massive forest fires that affected Europe in October 2018 as a consequence of an extraordinary heatwave, drought and heavy storm events. The presidency also took the opportunity to advocate a regulated exchange of knowledge and information in the framework of the EU Forest Strategy and the conclusion of the legally binding agreements on forests in the pan-European region.

In this context the Italian delegation also presented the effect of a recent storm on its forests in the northern part of the country.

Many delegations called for improved cross-border cooperation and a better use of EU tools to enhance the resilience of European forests.

– ***Difficult situation in the pigmeat market***

The Polish delegation informed the Council about the critical situation of the pigmeat market in Poland, due to the combination of steeply decreasing prices and rising production costs. Poland also took the opportunity to request the activation of private storage aid for pigmeat and financial support for producers, as part of exceptional measures.

While acknowledging the problems experienced by the Polish pigmeat sector, the Commission said it did not envisage the grounds for activating exceptional EU measures.

– ***State of play of various legislative files in the field of agriculture***

The presidency informed the Council about the state of play of the following legislative procedures:

- unfair trading practices - five trilogues took place under Austrian presidency and good progress was achieved. An additional and possibly conclusive trilogue was in the process of being organised;
- spirit drinks - a political agreement with the European Parliament was achieved and adoption was expected for early spring 2019;
- fertilisers - a political agreement with the European Parliament was also achieved.

– *Follow-up to the fipronil incident: state of play of implementation*

The Commission informed the Council about the various follow-up actions taken at EU level in the aftermath of the fipronil incident of the summer of 2017.

The Commission also touched on its draft implementing decision updating the General Plan for crisis management in the field of food and feed safety. The plan is aimed at reinforcing cooperation and communication between the EU and member states and to ensure a harmonised approach during food incidents or crises, and should be adopted in the coming weeks.

OTHER ITEMS APPROVED

AGRICULTURE

Regulation amending general food law - General approach

The Council adopted a general approach on a draft regulation on the transparency and sustainability of the EU risk assessment in the food chain ([15559/18 ADD 1](#), [15559/18 ADD 1 COR 1](#), [15559/18 ADD 2](#)).

See press release: [More transparent scientific studies on food safety: Council agrees its position](#)

FISHERIES

2019-2020 fishing opportunities for certain deep-sea fish stocks - adoption

The Council adopted a regulation fixing for 2019 and 2020 the fishing opportunities for Union fishing vessels for certain deep-sea fish stocks ([14418/18](#)).

See press release: [Deep-sea fish stocks: agreement on catch limitations over 2019 and 2020](#)

2019 fishing opportunities for certain fish stocks in the Black Sea- adoption

The Council adopted a regulation fixing for 2019 the fishing opportunities for certain fish stocks and groups of fish stocks in the Black Sea ([14292/18](#) + COR 1).

See press release: [Council adopts 2019 catch limits for Black Sea fisheries](#)

FOREIGN AFFAIRS

EUBAM Libya

The Council adopted a decision mandating the EU integrated border management assistance mission in Libya (EUBAM Libya) to actively support the Libyan authorities in contributing to efforts to disrupt organised criminal networks involved in smuggling migrants, human trafficking and terrorism. The mission was previously mandated to plan for a future EU civilian mission while engaging with the Libyan authorities.

The mission's revised mandate will run until 30 June 2020. The Council also allocated a budget of € 61.6 million for the period from 1 January 2019 to 30 June 2020.

In order to achieve its objectives EUBAM Libya provides capacity-building in the areas of border management, law enforcement and criminal justice. The mission advises the Libyan authorities on the development of a national integrated border management strategy and supports capacity building, strategic planning and coordination among relevant Libyan authorities. The mission will also manage as well as coordinate projects related to its mandate.

EUBAM Libya responds to a request by the Libyan authorities and is part of the EU's comprehensive approach to support the transition to a democratic, stable and prosperous Libya. The civilian mission co-operates closely with, and contributes to, the efforts of the United Nations Support Mission in Libya.

The mission's headquarters are located in Tripoli and the Head of Mission is Vincenzo Tagliaferri (from Italy).

[EUBAM Libya](#)

Sanctions in view of the situation in Libya

The Council amended the EU restrictive measures in view of the situation in Libya, in line with a resolution adopted by the United Nations Security Council on 5 November 2018.

The Council added refined petroleum products to the embargo on illicit oil exports from Libya. The measures now apply to vessels transporting petroleum, including crude oil and refined petroleum products, illicitly exported from Libya. Member states are authorized to inspect vessels in the high seas and direct the vessel to take appropriate actions to return petroleum to Libya.

The Council also amended the sanctions criteria to include perpetrators of sexual or gender-based violence. The EU imposes sanctions on individuals threatening the peace, stability or security of Libya, or obstructing the successful completion of its political transition. These sanctions consist of an asset freeze and a travel ban.

[EU - Libya relations](#)

Gender mainstreaming policies in the fight against small arms misuse

The Council adopted a decision in support of gender mainstreamed policies, programmes and actions in the fight against small arms trafficking and misuse, in line with the women peace and security (WPS) agenda.

On 19 November 2018, the Council adopted a new EU strategy against illicit firearms, small arms and light weapons and their ammunition entitled "securing arms, protecting citizens".

On 10 December 2018, the Council adopted conclusions welcoming the new EU strategic approach to WPS. This approach emphasises the need for systematic integration of a gender perspective into all fields and activities in the domain of peace and security, and overall in EU external actions.

[Securing arms, protecting citizens: Council adopts new EU strategy against illicit firearms, small arms and light weapons and their ammunition, 19 November 2018](#)

[EU Statement – United Nations Security Council: Promoting the implementation of the Women, Peace and Security Agenda and Sustaining Peace through Women’s Political and Economic Empowerment, 25 October 2018](#)

EUCAP Sahel Mali

The Council decided to extend the mandate of EUCAP Sahel Mali, as well as the mission's budget, until 28 February 2019. The mission's mandate previously expired on 15 January 2019.

EUCAP Sahel Mali is a EU civilian mission based in Bamako, Mali. It was launched on 15 January 2015, following an official invitation by the Malian government to assist the internal security forces with reasserting the government's authority over the whole of the country, following the 'Northern Mali crisis'.

[EUCAP Sahel Mali](#)

Countering small arms and light weapons in Latin America and the Caribbean

The Council adopted a decision in support of countering illicit proliferation and trafficking of small arms, light weapons (SALW) and ammunition and their impact in Latin America and the Caribbean, in the framework of the EU strategy against illicit firearms, small arms & light weapons and their ammunition entitled "securing arms, protecting citizens".

[Securing arms, protecting citizens: Council adopts new EU strategy against illicit firearms, small arms and light weapons and their ammunition, 19 November 2018](#)

[Small Arms and Light Weapons \(EEAS\)](#)

Operation Atalanta

The Council agreed that Operation Atalanta will be authorized to transfer information to INTERPOL and EUROPOL, including personal data obtained under the existing legal framework, gathered on illegal activities other than piracy during the course of its counter-piracy operations while the mandate of the mission remains unchanged.

The Council also amended its decision on Operation Atalanta in order to take into account the termination of the mandate of the UN Somalia and Eritrea monitoring group and the establishment of the UN panel of experts on Somalia with the same tasks in relations to Somalia.

EU NAVFOR Operation Atalanta contributes to the deterrence, prevention and repression of acts of piracy and armed robbery off the Somali coast. The operation is part of the EU's comprehensive approach for a peaceful, stable and democratic Somalia.

[EU Naval Force Operation Atalanta](#)

ECONOMIC AND FINANCIAL AFFAIRS

Luxembourg 2 euro commemorative coin

The Council took note of the intention of Luxembourg to issue a 2 euro commemorative coin to be issued in 2019 to commemorate the 100th anniversary of the accession to the throne of Grand Duchess Charlotte. (14851/18)

TRADE

Agreements under Article XXI of the General Agreement on Trade and Services (GATS)

The Council adopted a decision approving agreements with Argentina, Australia, Brazil, Canada, China, the Separate customs territory of Taiwan, Penghu, Kinmen and Matsu (Chinese Taipei), Columbia, Cuba, Ecuador, Hong Kong China, India, Japan, Korea, New Zealand, the Philippines, Switzerland, and the United States on the necessary compensatory adjustments under Article XXI of GATS resulting from the accession of the Czech Republic, the Republic of Estonia, the Republic of Cyprus, the Republic of Latvia, the Republic of Lithuania, the Republic of Hungary, the Republic of Malta, the Republic of Austria, the Republic of Poland, the Republic of Slovenia, the Slovak Republic, the Republic of Finland and the Kingdom of Sweden to the European Communities.

Pursuant to article XX of the GATS, WTO members have to set out in a schedule the specific commitments they undertake under the general agreement. The current schedule of the EU and its member states only covers commitments related to the twelve member states of 1994.

An update of the special commitments was therefore necessary, in order to ensure that member states that joined the EU after 1994 are covered by limitations included in the list of specific commitments of the European Union and to ensure consistency with the *acquis communautaire*. ([14018/1/18 REV 1](#), [14019/18](#), [14020/18](#))

INTERNAL MARKET AND INDUSTRY

Type approval of two or three-wheel vehicles and quadricycles

The Council approved the European Parliament's position on the proposed regulation, which adapts the rules on type-approval of a wide range of light motor vehicles with two, three or four wheels to take account of the latest scientific data.

The regulation is therefore adopted as set out in PE-CONS 65/18.

Classification, labelling and packaging of substances and mixtures

The Council decided not to object to a Commission regulation concerning amendments to the Annexes of Regulation (EC) No 1272/2008 of the European Parliament and of the Council of the European Parliament and of the Council on classification, labelling and packaging of substances and mixtures.

The regulation is a delegated act pursuant to article 290 of the Treaty on the Functioning of the EU. It can now enter into force, unless the European Parliament objects.

TRANSPORT

Trans-European transport network guidelines - update of annexes

The Council decided not to object to a Commission delegated regulation on the adaptation of annex III to regulation 1315/2013 containing Union guidelines for the development of the trans-European transport network (TEN-T) ([14862/18](#), [14245/18](#) + ADD 1 - ADD 6).

The regulation is a delegated act pursuant to article 290 of the Treaty on the Functioning of the EU. This means that now that the Council has given its consent, the act can enter into force, unless the European Parliament objects to it.
